

Fall River Trial Court Fall River, Massachusetts

The new 145,000 s.f. courthouse will include nine courtrooms for district and superior courts and related administrative functions, including jury rooms, office space, and archive storage. It will also house a law library and child care facility. Design criteria for the facility includes maximizing building performance and environmental sustainability and emphasizing energy performance and stormwater management. All courtrooms will feature natural lighting. The project expects to receive Silver LEED Certification.

New Fall River Trial Court (conceptual)

For Fall River, The Green Engineer:

- Participated in the development of design criteria and other material for public charrette;
- Developed a written sustainability plan for the project, outlining design goals and strategies, including a target LEED score sheet.

Architect: Finegold, Alexander & Associates
MEP Engineer: Arup
