

# The Green Engineer, LLP

## Sustainable Design Consulting

The Green Engineer, LLP is a sustainable design consulting firm led by Christopher Schaffner, P.E., LEED AP, a nationally recognized expert in cost-effective, high-performance design. We work with architects, builders, commercial owners, non-profits, and the government sector to provide the following design services:

- **Sustainable Design Consulting** – Conceptual advice, design reviews, project assessment, and project-specific cost-benefit analysis.
- **LEED Certification Project Management** – Expertise to help your team successfully and most effectively use the USGBC LEED Green Building Rating System.
- **Energy and Daylight Modeling** – Key computations to quantify the strengths of different design options. We recommend energy and daylight modeling early in the design process for best results.
- **Design Review Services** – Expertise in reviewing a building's design.
- **Charrette Facilitation** – Facilitation of design charrettes.
- **Sustainability Training and Coaching** – Expertise in training professionals in the USGBC LEED Green Building Rating System.

The Green Engineer, LLP is a Member of the USGBC, an Energy Star Partner, a LABS21 Supporter and a participant in the Architecture 2030 Challenge.
